

COMPREHENSIVE EQUIPMENT CATALOGUE

High-quality medical equipment and solutions that transform patient care, curated for excellence in every healthcare setting.

FOLLOW US

About ZENROX

Zenrox Healthcare, headquartered in London with regional operations across Africa, is at the forefront of transforming healthcare delivery through innovative medical equipment distribution solutions.

As a technology-driven company, we combine global expertise with deep local understanding to revolutionize how healthcare facilities access and acquire medical equipment across Africa.

Our Global Presence

- Global Headquarters: London, United Kingdom
- Regional Office: Lagos, Nigeria
- Service Coverage: Pan-African with focus on West African markets

Our Vision

To be Africa's leading medical equipment solutions provider, making quality healthcare technology accessible to every healthcare facility across the continent.

Our Mission

To revolutionize healthcare delivery in Africa by providing efficient, technology-driven solutions for medical equipment procurement and distribution, while maintaining the highest standards of quality and service excellence

SonoScape S11 Plus

Integrated Ultrasound Solutions

SonoScape S11 Plus

The SonoScape S11 Plus delivers versatile, high-performance ultrasound imaging through its advanced digital color Doppler system. With innovative technologies like SCI and μ -scan, it provides exceptional image quality while offering comprehensive applications across multiple medical specialties. The system combines professional-grade capabilities with user-friendly operation.

Advanced Imaging Module

- High-quality 15" LCD color monitor (1024 x 768 resolution)
- Multiple imaging modes including B, M, PW and TDI
- Anatomical M-mode for fetal heart examinations
- Static 3D/4D imaging capabilities
- Panoramic imaging functionality

Professional Applications Module

- 4 transducer ports for multi-specialty use
- Comprehensive range of transducer options
- Applications across OB/GYN, cardiology, urology
- Biopsy attachment compatibility
- Complete DICOM 3.0 connectivity

Enhanced User Experience Module

- Articulating monitor arm with 30° tilt
- User-friendly control panel with backlit keys
- 500GB storage capacity
- Optional battery for 60+ minutes mobile use
- Multiple language support

Digital X-Ray Floor Mounted - Drgem GXR-SD 400ma

- High-quality digital imaging
- Advanced image processing
- Reliable performance

Operating Table

Mindray HyBase™ 6100

Versatility Beyond Expectation

Mindray HyBase 6100

Providing a better clinical use's scenario, HyBase 6100 is designed with a much lower table height of 498mm specially for neurosurgery and minimally invasive surgery, a more user-friendly base cover, as well as a more convenient wireless remote-control system. Moreover, with longitudinal slide up to 320mm, the table is ideally suitable for cardiovascular surgery or spinal surgery with C-arm. All in all, HyBase 6100 maximizes the flexibility of operating table's versatility.

Flexible Patient Positioning

Excellent Versatility

With the need of minimally invasive surgery and neurosurgery, lowest table height becomes the key to providing a more comfortable and better ergonomic working environment for surgeons. HyBase 6100 with the lowest table height of 498mm makes it perfect for the MIS and neurosurgery.

BC-30s/20s/10

Auto Hematology Analyzer

Mindray 3-part hematology analyzers is the culmination of that effort. Compact yet powerful, full featured yet affordable, the BC-30s/20s/10 is what a 3-part analyzer should be.

Smallest footprint

Convenient, fast

More confidence in results

More confidence in results

Advanced detailed flag information provides warning in case of abnormal cell results. High quality original reagent calibrators and quality controls help you maintain a high level of work efficiency. We integrate technologies into our products to fulfill your clinical needs.

Saving more time

Smart and intuitive software brings your productivity up to a new level. The TFT touch screen makes operations easy and flexible, maximizing your efficiency. The large storage capacity gives you an optimized solution to manage previous patients' data. The smart software can detect and remove operational errors, as well as run automatic maintenance with a single click.

Less downtime

Quality and user experience are top priorities for Mindray. We design and manage our manufacturing processes in compliance with FDA, ISO and CE. Complete quality control systems in Mindray's manufacturing centers ensure we exceed the most stringent criteria and traceability throughout the entire process. Our professional and responsive support team makes sure your systems are kept at full capability.

BS-240
Clinical Chemistry Analyzer

“CUTE”Chemistry
Solution

-37%
Smaller than BS-200E

Compact:

One of the smallest 200 T/H chemistry analyzers in the market, achieving maximum space saving;

Technology:

Smart-sampling technology enables automatic hemolysate preparation for HbA1c test. Pretreatment-free operation guarantees high productivity.

Utility:

- Step-by-step maintenance guide for easy operation;
- Upgraded auto-washing system ensures low carryover and low water consumption.

Large capacity of 80 reagent positions and 40 sample positions extendable to 80.

Efficient:

A minimum of 100µl reaction volume for reagent saving.

Sonoscape P15 With Four Probes

A feature-rich system inheriting the Wi-Sono high-end platform, the P15 uses an array of advanced tools to help enhance the image quality. It's a cost-effective, simplified console with an intuitive user interface and multiple intelligent functions.

3D/4D

Outstanding volume performance with speed and convenience makes P15 outshine others on volume imaging

Tissue Doppler Imaging

Tissue Doppler Imaging allows clinical doctors to quantitatively evaluate local myocardial movements and functions, facilitating them with the ability to analyze and compare the motions of the different parts of the patient's heart.

Auto IMT

Quick measurement of intra-media vessel thickness ensures good reproducibility and high diagnostic efficiency.
